

Galaxis Showtechnik – Germany

Galaxis History:

Since 1995 Galaxis have been pioneering in the field of wireless firing techniques and are leaders in technology and innovation in this sector. Produced and manufactured in Neuoetting Germany, it has around 12 distributors worldwide and 24 countries as customers.

Galaxis was used in many events like Knokke-Heist Fireworks Competition 2005 in Belgium Pyrovision wins, Robbie Williams Tour 2006, Pyrosolution in the Champions League Final 2007, Chantilly 2008 Pyrovision wins, Pyrosolution Euro 2008 Final in Vienna, Pyrovision in Montreal 2008 and Cannes 2008 Flash Barradov wins.

Our Story:

We were searching in the internet for some firing system and Galaxis was the most that impressed us. We made some contacts with the CEOs of the company Alexander Buchner and Ralph Kraenzle and they invited us at their premises in Germany for a demonstration of the system. After a few weeks we went to Germany for the demonstration and we liked the system, it was very sophisticated. So we brought the system and last year we fired our first show with the Galaxis Wireless Firing System on 14th August 2008 in Ghaxaq.
